

Press release

KABTEC AG strengthens activities in China

KABTEC AG, with its headquarters in Bad Feilnbach - Au, strengthens its activities in China through a cooperation with MTCS as service partner China.

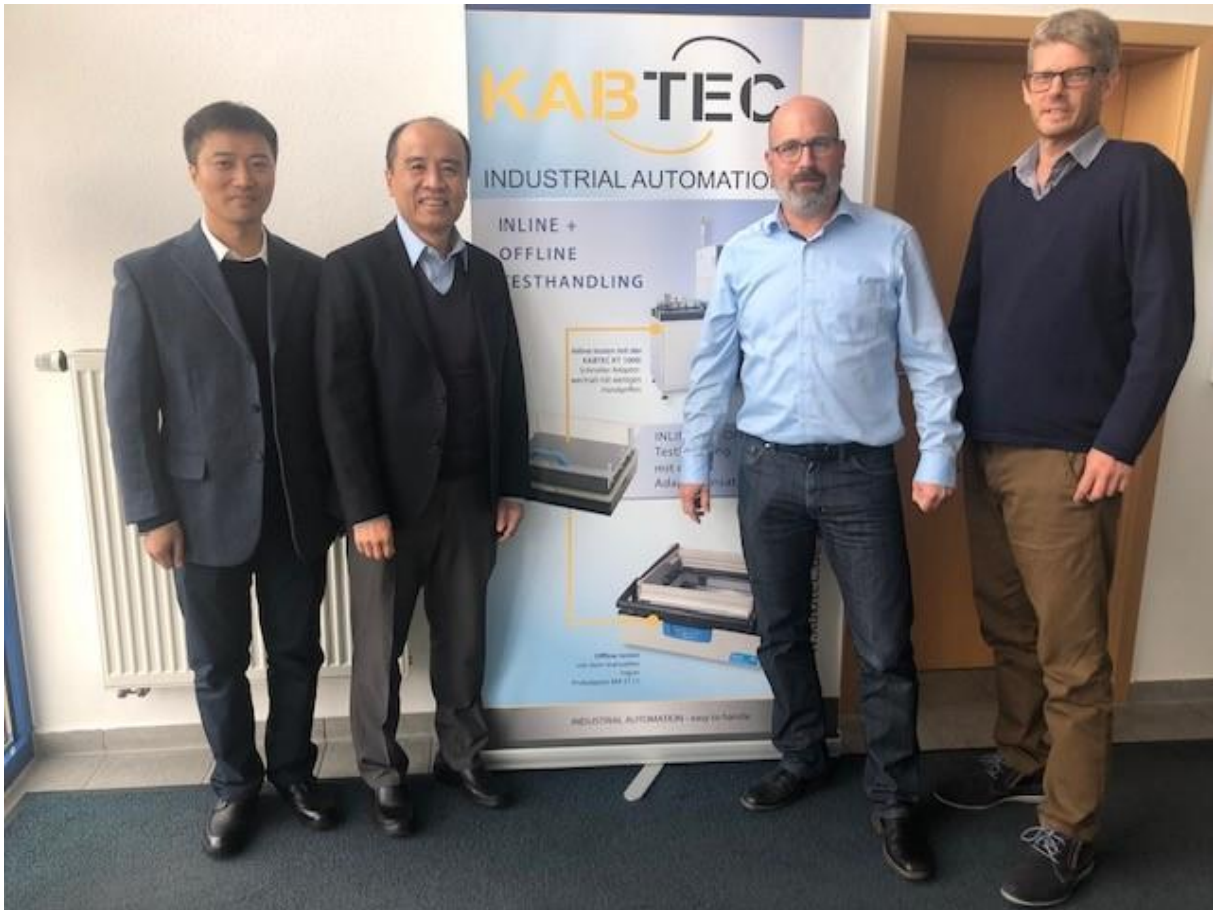

Since the middle of 2023, the two companies have been working closely together on initial projects and have already installed the first systems at customer sites in China, according to Board member/CEO Ulrich Baumgartner. In detail, it is not only about on-site installation and commissioning, but also about the support and servicing of test handling systems and special automations.

As a plant and machinery manufacturer, KABTEC serves customers with an international footprint, says Markus Hübsch, Board member Sales & Operations, and for this it is necessary to position itself locally. We are very happy to have found a partner in MTCS that can offer us a local presence throughout China. MTCS has several locations in China, including its own development office with a total of over 60 colleagues. This means that support can be provided throughout China, supported by KABTEC's own service personnel as well as remotely.

We will work the Chinese market together and be able to serve our customers with fast on-site service, adds CEO Ulrich Baumgartner. The speed or response time for such operations without language barriers and independent of time zones is to be seen as the biggest benefit. Coupled with the expert knowledge and remote support of KABTEC colleagues from development, design and software, this best possible support can be guaranteed permanently. The expertise and many years of experience of the colleagues from MTCS in the areas of integration and service make this close technical cooperation possible, which will be successively expanded.

To strengthen the cooperation, MTCS visited the development and production site Bad Feilnbach - Au of Kabtec in October 2023.

KABTEC AG is a medium-sized company in Bad Feilnbach - Au in the field of special machine construction and today employs over 40 people at its Bavarian location.
